

Periodic Incident Report

1. Total Incidents

- **7 incidents** reported during the period.

2. Most Common Incident Type

- **Fire** : 4 incidents (57% of total).
- **Assault** : 3 incidents (43% of total).

3. Severity Distribution

- **Critical** : 4 incidents (57%).
- **Warning** : 2 incidents (29%).
- **High** : 1 incident (14%).

4. Locations with Highest Incidents

- Incidents distributed across **7 locations** (1 incident per location):
 - Al Mushrif, Al Raha Beach, Reem Island, Yas Mall, Corniche Road, Khalidiya Mall, Hamdan Street.

5. Open vs Closed Case Summary

- **Open Cases** : 4 (57%):
 - **3 fires** (in progress).
 - **1 assault** (unresolved).
- **Closed Cases** : 3 (43%):
 - **2 assaults** (resolved).
 - **1 fire** (resolved).

6. Key Observations & Recommendations

- **Observations** :
 - **Fires dominate** , with 57% of incidents, including 3 active cases.
 - **Critical severity** incidents account for 57% of total cases.
 - **Assaults** show a concerning trend, with 2 resolved but 1 unresolved critical case.
 - No location repeated, indicating widespread distribution.
- **Recommendations** :
 - Prioritize **fire safety audits** and public awareness campaigns in high-traffic areas (e.g., malls, streets).
 - Allocate additional resources to resolve the **unresolved critical assault** on Corniche Road.
 - Enhance patrols in areas with recurring critical incidents (e.g., Reem Island, Hamdan Street).
 - Review protocols for rapid response to in-progress incidents, particularly fires.
