Weekly Incident Report

Total Incidents:
7

Most Common Incident Type:
Fire (4 incidents)

Severity Distribution:
- Critical: 4
- High: 1
- Warning: 2

Locations with Highest Incidents:
- Abu Dhabi (All incidents occurred in Abu Dhabi; no single sub-location reported more than one incident).

Open vs Closed Case Summary:
- **Open Cases:** 4 (3 fires "in progress," 1 critical assault "unresolved")
- **Closed Cases:** 3 (2 assaults, 1 fire marked "resolved")

Key Observations:
1. **Fire incidents dominated** (57% of total cases), with 3 critical cases and 2 warnings still active.
2. **Critical severity prevalent**: 57% of incidents were critical, including fires and assaults.
3. **Unresolved critical assault** on Corniche Road requires immediate attention.
4. **Commercial areas at risk**: Fires reported at Yas Mall and Khalidiya Mall (both "in progress").

Recommendations:
1. Prioritize fire safety inspections and public awareness campaigns in high-risk zones (e.g., malls, Hamda
2. Deploy additional resources to resolve the unresolved critical assault on Corniche Road.
3. Review emergency response protocols for critical incidents to reduce resolution time.
4. Increase patrols in areas with active fire warnings (Yas Mall, Khalidiya Mall, Al Mushrif).
